
This Quick Reference Guide (QRG) demonstrates reviewing the Women's Health Inpatient Provider View within PowerChart Maternity.

Complete the Women's Health Inpatient Provider Overview

Review this workflow to aid in reviewing the Women's Health Inpatient Provider view within PowerChart Maternity.

Review the Pregnancy Overview Components

➤ **From the Provider Handoff page**

STEP 1: Click the **Tracking Board** option. The Tracking Board displays.

NOTE: Information here is organized into columns for each patient and may vary depending on when the nurse imports the data.

STEP 2: Highlight the record for the patient that is being seen.

STEP 3: Scroll right to bring additional columns into view.

STEP 4: Click the right arrow icon that appears next to the patient's record.

- The patient's chart is displayed in Provider View.

STEP 5: Click **EDD Maintenance**.

- The EDD Maintenance component displays a checkmark icon next to the date being used for the EDD.

STEP 6: Click **Results Timeline**.

- The Results Timeline component displays. This component begins with the onset of pregnancy and displays weekly until the patient delivers.

STEP 7: Click the graph bar for the week of visit that is being reviewed.

- The date and location information display for that visit.

STEP 8: Click **Fetal Monitoring**.

- The Fetal Monitoring component displays. Episodes of fetal monitoring during pregnancy can be accessed here by selecting the checkbox in front of the date needed.

STEP 9: Click **Birth Plans**.

- The Birth Plans component displays information pulled from the nursing intake about what the patient wants for her birthing plan.

STEP 10: Click **OB Provider Delivery**.

- The OB Provider Delivery component displays a list of the current delivery notes.
-

STEP 11: Click the **OB Provider Delivery** header. The iView and I&O screen displays.

NOTE: There are multiple bands within this view that should be documented, some of these items are used in both the ambulatory and inpatient settings.

STEP 12: Click **Provider Delivery Documentation**.

NOTE: Delivery details can be reviewed at the top of the screen and to navigate to additional bands as needed.

STEP 13: Click **Intake and Output**.

- In this band users can document and review information, with totals along the top of the window.

STEP 14: Click the **Home** icon.

- The Provider View opens defaulted to the Triage/Antepartum MPage.

STEP 15: Click **Partogram**.

- The Partogram MPage displays. This page becomes available once a pregnancy instance has been opened for the patient and a labor onset date and time have been documented.
- Early deviations can be identified from the normal progress of active labor, as well as maternal physiological deterioration.

STEP 16: Click **GYN Inpatient**.

- The GYN Inpatient MPage displays. The page is used for patients who are admitted for non-OB reasons. Use the **Arrow** icons to expand and collapse information as needed.

STEP 17: Click **Risk Indicators**.

- The Risk Indicators component displays. Use the **Arrow** icons to expand and collapse information for a more or less detailed view.

STEP 18: Click the **Toggle Workspace** icon to open the Clinical Entry Workspace.

- The Clinical Entry Workspace contains the Subjective/History of Present Illness, Review of Systems, Objective/Physical Exam, and Assessment and Plan Dynamic Documentation components. Document these components using auto text phrases or free text.

STEP 19: Scroll down in the component menu.

- Below the components are the Create Note Dynamic Documentation templates. Document these note templates using auto text phrases or free text.
