
This Quick Reference Guide (QRG) demonstrates the pediatrician newborn workflow.

Women's Health Pediatrician Newborn Workflow

Review this workflow to aid in the care of newborns in the Well Newborn nursery.

Complete the Newborn Nursery Overview

➤ From the Provider View:

STEP 1: Click the **Tracking Board** option.

- The Tracking Board displays.

NOTE: Information here is organized into columns for each patient and may vary depending on when the nurse imports the data. If the baby is seen right after delivery, information may not be in the chart immediately.

STEP 2: Click the blank **Patient Selected** field.

- The Assign a Relationship pop-up box displays.

STEP 3: Click **Consulting Physician**.

STEP 4: Click **OK**.

- The Neonate MPage displays.

Complete the Neonate MPage

➤ From the Neonate MPage:

STEP 1: Click **Neonate Weights and Measurements**.

- The Weights and Measurements component displays the weight and head circumference in a timeline. The timeframe can be altered from present to the previous 72 hours.

STEP 2: Click **Task Timeline**.

- The Task Timeline displays and provides visibility into important elements of care to be completed during a newborn's stay.

STEP 3: Click **Vital Signs**.

- The patient's vital signs display and can be sorted based on date and time and can also be displayed in either list or graph format using the toggle options.

NOTE: Generally apneic events are not used within our general newborn nurseries and would be documented in the Apnea Bradycardia Desaturation component if available.

STEP 4: Click **Order Profile**.

- The Order Profile displays recent orders.

STEP 5: Click **Hyperbilirubinemia**.

- The infant bilirubin level, time of draw and method (transcutaneous or serum) is graphed to display the risk prediction.

STEP 6: Click **Phototherapy**.

- When phototherapy is initiated, how the infant is progressing is presented in graph format. Scroll down to review the graph legend to aid in interpreting the results.

STEP 7: Scroll down in the Neonate MPage component list, then click the **Advanced Growth Chart** component.

- The Advanced Growth Chart is now available on this page. Additionally, the Scales and Assessments component displays and is where the patient's Ballard Score is documented.

STEP 8: Scroll down to the end of Neonate MPage component list.

- A list of Dynamic Documentation templates displays; from the list select the appropriate one to create notes.

STEP 9: Select the appropriate Dynamic Documentation template to create the note.

Review Additional Summary Reports

➤ **From the Provider View:**

STEP 1: Click the **Expansion** arrow next to the New Sticky Note option.

STEP 2: Click the **Related Records** option.

- The mother's chart displays.

NOTE: **When the infant's chart is open, toggle back and forth between both charts.**

STEP 3: Scroll down the Menu list.

STEP 4: Click **Pregnancy Summary Report**.

- The Pregnancy Summary Report displays information from the onset of pregnancy until the delivery of the baby and summarizes the prenatal course of care.

STEP 5: Scroll down on screen to review the remainder of the report.

STEP 6: Click the **X** to close the Pregnancy Summary Report.

STEP 7: Click the **Neonate Overview** header.

- The Results Review screen displays defaulted to the delivery record where a quick overview of the patient's documented results can be viewed.
-

- Here information can be reviewed that was copied from the mother's to the infant's chart in Results Review and organize the patient's results into specific areas using the Navigator section.
