

Bedside Medication Delivery Program, commonly referred to as Meds to Beds, is a service where a NLH Retail Pharmacy receives a prescription and delivers the medication to the patient bedside at the time of discharge. The program is expected to help decrease readmission rates where medication non-compliance is a major factor and add convenience for the patient by eliminating the need to stop at a pharmacy to pick up prescriptions.

Meds to Bed Workflow

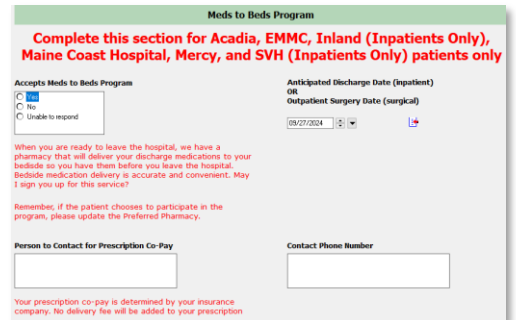

➤ Care Compass Task

- Inpatient Nursing will receive a task in Care Compass at 0800 the day after admission to invite the patient to participate in the **Meds to Beds** program.
 - Scripting has been added to the form to assist the nurse when inviting the patient to participate.

Click **Document** to open the form.

- Document **Anticipated Date of Discharge** if it has not auto-populated from previous documentation.
- Selecting **Yes** fires a task to the NLH Retail Pharmacy notifying them the patient wishes to participate in Meds to Beds.

NOTE: ICU/Critical Care Nurses do not receive a Care Compass task for patients admitted to an Intensive/Critical Care nursing unit. When a patient is transferred out of ICU/Critical Care, the Transfer Level of Care order prompts a Care Compass task at 0800 the day after transfer. If a patient is being discharged from ICU/Critical Care, the ICU/Critical Care nurse should invite the patient to the program using the Invite Patients to the Meds to Beds Program form in the Admission/Discharge AdHoc folder.
