

SurgiNet Optimization for Mercy Surgeon's PostOp PowerPlan and Discharge MPage

On **Monday, June 17**, **Surgeon's PostOp PowerPlan and Discharge MPage** will be introduced to the Phase II recovery areas at Mercy. The update will ensure that all post operative medications administration and patient care orders will flow to PowerChart in the Phase II recovery areas. The change will enable other clinical staff in different areas to see what medications or patient care was provided in the post operative areas.

Will there be any support for this Go-Live?

- At-the-elbow support will be provided for OSSC and Fore River Post Surgical areas:
 - June 17 to June 21: 7 AM to 5 PM.
 - June 24 to June 28: 7 AM to 5 PM.

What will change for the recovery nurse?

- **Recovery Nurse:** The Surgeon's PostOp PowerPlan will provide directions for the care of the patient in the postoperative period and allow for scanning medications.

What will change for the provider?

- **Surgeons/Proceduralists:** The PowerPlans will allow nurses to document and review orders electronically. Another change will include the use of the **OP Discharge MPage** that will also allow the nurses to use the discharge process to its full functionality. Below are links to flyers that will help make the process easier.
 - [OP Surg Discharge MPage](#)
 - [PowerPlans - Saving, Adding to Phase, etc.](#)
 - **SURG Post Op Outpatient**
 - [Auto Text Copy Utility MPage](#)
 - A tool that provides a way to look and copy other provider's post operative discharge instructions.

Clinical Informatics – Please share this information with **Mercy's Fore River and OSSC Surgical Phase II areas staff** and make this a topic of discussion in upcoming rounding.

*Behavioral Health: This information **does not** affect behavioral health caregivers.*
