ImageTrend EMS Runsheets Go-Live

WHEN: **Monday, November 18, 2024**

WHERE: **The change will affect the following venue(s):**
- ED Only

At the following NLH Member Organization(s):
- Northern Light Mercy Hospital

WHO: **The change will affect the following staff at the above noted locations:**
- ED Nurses
- ED Nurse Techs
- Unit Coordinators

WHAT: **ImageTrend**, a software platform used by **Emergency Medical Services**, enables EMS personnel to electronically document details about **patient care, treatment, and transport**. The documentation is part of an electronic patient care report (**ePCR**). Once signed, the ePCR will be sent **electronically** through direct messaging to **FirstNet Message Center**. **This will allow clinical staff to attach the documentation directly to the patient chart.**

WHY: The platform is designed to improve data accuracy and facilitate the sharing of patient information.
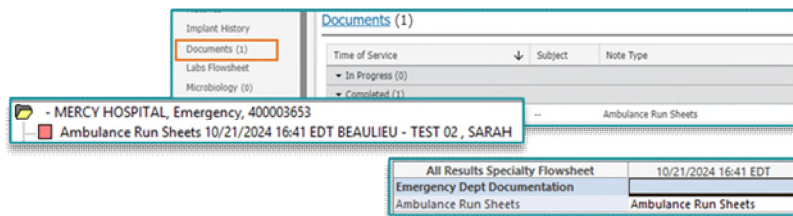

HOW: **Monitoring Results**

- Identified clinical staff will monitor the **Mercy EMS Runsheets Pool** in **FirstNet Message Center** and follow the patient match process for ePCRs.

- Once the Ambulance Runsheet is matched, an **icon** will appear within the **Patient Information** column on **ED LaunchPoint**.

- The **EMS Amb. Run Sheet alert** will notify emergency department staff an **Ambulance Runsheet** is available to view.
